

MAGICFETCH APP – ONE PAGE PROJECT SUMMARY

1. Project Vision & Scope

MagicFetch is a mobile platform designed to help users quickly request, track, and manage item fetching or service tasks with ease and trust.

2. Feature Finalization

- User Authentication (Login, Signup, Password reset)
- Home Dashboard (Recommendations, Search bar, Quick categories)
- Request System (Create, track, update, cancel requests)
- Vendor Tools (Accept/Decline requests, update status)
- Profile & Settings (Edit profile, notification preferences)

3. UI/UX Decisions

- Primary Color: #5A4BE7
- Secondary Background: #F6F3FF
- Accent Color: #FFB400
- Neutral Greys for text hierarchy

Typography chosen for clarity and modern look. Buttons and cards use rounded corners and spacious layouts for readability.

4. Design Process

- Designed Login → Home → Request Flow → Profile
- Established spacing, colors, and component system
- Created brand vibe direction for logo designer

5. Current Progress

- Features finalized
- Color palette finalized
- User flow mapped
- Wireframes in progress

- UI design ongoing
